

About Us

The County Water District of Billings Heights strives to promote water quality protection, water conservation, and a variety of other essential services. We provide the water and maintain the distribution system for our residents and businesses within our water service area. Currently the District operates and maintains over 140 miles of distribution pipe and more than 6000 connections. As our water district grows, we continue to find new ways to provide superior service and water quality for all of our communities residents and businesses.
